

Program Sustainability Assessment Tool

Implementing evidence-based programs has the greatest health impact when the resulting benefits can be sustained over time. The [Program Sustainability Assessment Tool \(PSAT\)](#) is a quick, free, online resource for public health program administrators, partners, and evaluators. The PSAT can help you rate and understand your capacity to sustain your comprehensive commercial tobacco prevention efforts.

The [Program Sustainability Framework](#) identifies eight domains that can help build capacity for maintaining your tobacco control program.

- **Environmental Support**
- **Funding Stability**
- **Partnerships**
- **Organizational Capacity**
- **Program Evaluation**
- **Program Adaptation**
- **Communications**
- **Strategic Planning**

PSAT | Program Sustainability Assessment Tool

sustaintool.org

The sustaintool.org website gives users:

- **Access to the Program Sustainability Assessment Tool (PSAT)** to rate your practice across seven sustainability domains
- **A detailed report** of your program sustainability assessment results with recommended next steps for sustainability planning
- **A free custom profile** to create and store your individual and group assessments
- **Access to sustainability planning resources**, including descriptions of the seven clinical sustainability domains and resources to guide the sustainability planning process

Let us help you develop your sustainability plan!

Our team at the [Center for Public Health Systems Science](#) at Washington University in St. Louis, creators of the PSAT, are available to provide sustainability training and assist OSH awardees in developing a plan to sustain their tobacco prevention and cessation efforts at no cost. Contact your PHA or **Kim Prewitt** at kprewitt@wustl.edu for more information.
